

DSARS made easy

Are you struggling with large DSARs or high volumes of requests, and to meet statutory deadlines with a lean team?

SmartSAR is here to help.

DSARs are traditionally manual and costly to process, and are increasingly weaponised for their disruptive nature. SmartSAR offers a technology-powered, outsourced managed-service solution that ensures precision, efficiency, and peace of mind so you can focus on your strategic priorities.

The service includes:

- scope assessment
- clear, fixed-cost pricing
- data ingestion
- technical filtering, review, classification and expert redaction
- secure delivery via SmartSAR portal.

Expertise meets technology

Shoosmiths combines legal expertise with advanced processing tools to provide a fixed-fee, managed DSAR service. Our holistic approach reduces operational burden by reducing data volumes or taking the issue off your desk completely.

Transparent pricing, no commitment

Unlike any other solution on the market, SmartSAR offers upfront, fixed-fee pricing *before* you commit, giving you clarity, and leverage when comparing options or negotiating settlements.

All-in-one DSAR solution

Our proprietary privacy playbook compresses datasets, reducing the scope of expensive review. In addition, our lawyers isolate **sensitive or contentious material** before disclosure, highlighting contentious materials and ensuring you have fully visibility of sensitive issues before disclosure.

Choose to fully outsource or use our tech to streamline your internal review. SmartSAR is adaptable to your resources and preferences.

START: Cleanse & quote

- any size, any language, any format
- preliminary DSAR advice and settlement support, e.g. ID verification, scope challenge, deadline extension, etc (optional)
- technology cleanses uploaded data (reducing document volume typically by 75-95%).

OUTPUT: TWO fixed fee quotes/options, (no charge if you don't proceed).

FIXED FEE OPTION 1

Cleanse data only service

A low-cost service for those who want to leverage our technology but otherwise have the resources to process the redactions internally.

OUTPUT: provision of cleansed (i.e. 75-95% reduced) dataset for redaction and onward processing internally.

FIXED FEE OPTION 2

Full managed review

A comprehensive service for those who want to outsource the DSAR to our team, enabling them to focus on BAU:

- categorise documents for redaction, exclusion (i.e. legally exempt or out of scope), or further discussion (i.e. contentious/sensitive documents)
- redaction of third-party personal data and other information that is not the personal data of the requester
- upload redacted documents to portal
- draft response letter and delivery with portal access to data subject.

OUTPUT: redacted dataset and response letter delivered directly to data subject via SmartSAR portal.

Don't let DSARs overwhelm your operations. Empower your business with SmartSAR – efficient, compliant, and cost-effective.
